About Ultaire® AKP

Removable Partial Dentures

Discussion Guide

Patients with missing teeth may need their first removable partial denture (RPD) or a replacement. Below are some talking points about Ultaire® AKP RPDs to help you with their questions.

CHOOSE CONFIDENCE

- Metal-free with no shiny clasps so you can smile with confidence.
- Clasps can be colored to match your existing teeth.
- Drink coffee or wine without worrying about discoloration or staining.
- Personalized, bespoke fit means you don't have to worry that your RPD will fall out.

CHOOSE COMFORT

- Comfortable, lightweight — 60% lighter than a metal frame — for a fit that feels more natural.
- Slight “flex” makes it easy to put in and take out of your mouth.
- Taste-free so you can enjoy the foods you love without worrying about a metal aftertaste.
- Shorter, non-metal clasps are gentle on your mouth and won't irritate gum tissue.

CHOOSE CARE

- More natural than other RPDs to minimize bone loss and protect remaining teeth.
- Resistant to unhealthy bacteria¹ that can lead to bad breath, plaque, gum disease and toxins.
- Safe in your body because it's non-corrosive, non-toxic and non-irritating.
- Engineered to preserve the health of your gum tissue.

CHOOSE CONVENIENCE

- Digitally designed to fit right the first time, requiring fewer fittings.
- Durable clasps maintain shape with significantly less distortion than metal² — so your RPD may last longer and require fewer visits for adjustments.
